# Glass Splashbacks and Panels

## Standard Clear Glass Colour Range

Difference between Clear and Starphire glass

## Starphire Glass Colour Range

### Clear Glass vs Starphire (Low Iron)

Standard clear glass contains a certain amount of iron which appears green in colour. If you require colour accuracy for your colour backed glass, we recommend selecting Starphire (low iron) glass, as it contains less iron than standard clear glass, and will, therefore, appear to have less of a green tint.

### Specification

- All Glass is 6mm Toughened

### Application

- Kitchen
- Laundry
- Bathroom and Shower
- Wall Panel

**NOTE:** Colours featured are a graphic representation only. It is recommended that you view a physical sample prior to ordering. Any colour chosen outside this range may incur a surcharge and must be selected from the Dulux Colour Specifier fan deck.

Please visit our website and refer the *Marbut Stone Care & Maintenance Guide* for details on how to care for your glass products.
